

Dear Merchant:

Fragile X affects all nationalities and is the most common inherited cause of developmental disabilities worldwide. The Fragile X Association of Michigan provides information and support for families dealing with this very common but not well-known genetic condition. There are over 50 other Resource Centers across the country. The National Fragile X Foundation home office and Research Institute are located in California.

The 12<sup>th</sup> International Fragile X Conference is being held at the Hyatt Regency, in Dearborn, Michigan, July 21-25, 2010. The purpose of this event is to educate families, teachers and medical professionals about Fragile X. There will be approximately 1500 attendees.

**We are seeking donations for an auction being held at the Foundation Dinner on July 24 with 800 attendees. By donating merchandise, gift baskets or gift certificates you could help support the Foundation's broad-based efforts to aid families affected by Fragile X and facilitate research efforts worldwide.**

Sincerely,

Fragile X Association of Michigan

Attachment: Donation Registration Form
